Barbadoes tar — 2- -
Mix
Rub well the part affected
Morning and Evening

For Inflamitory Rhumatism

℞

Powdered Opium -- 9-grains
Calomel - — — 20- - -
Divide into 6 Pills
One to be taken every night at
bed-time - afterwards

℞

Mixture of Salls - 4- oz
Simple Smell - 2- -
Laudanum — 2 drams
dose
a table spoon full night
and Morning

CURE FOR VIRULENT SMALL-POX.—A merchant and ship owner of Boston has had the following sent him from England, where it was furnished by Mr. L. Larkin, member of the Royal College of Surgeons, and who vouches for it as a "medicine that will effect a revolution in the healing art, as regards the prevention and cure not only of small-pox, but also of measles and scarletina, however malignant the type, in a manner more efficient and extraordinary than could ever have been hitherto anticipated even by the most ardent philanthropist."

"On the first appearance of fever, or irritation ushering in attacks, whether occurring in families or large communities, the subjoined mode of treatment should at once be carried on:—Take one grain of powdered or digitalis, (valuable in the ratio of its greenness—the dark should be rejected,) and one of sulphate of zinc, (this article is commonly known as white vitriol.) These should be rubbed thoroughly in a mortar or other convenient vessel, with four or five drops of water; this done, a noggin (or about four ounces) more, with some syrup, or sugar, should be added. Of this mixture, a tablespoonful to a child every second hour, until symptoms of disease vanish.

"Thus conducted, convalescence, as if by magic, will result. The rapidity of an event so auspicious will equally delight and astonish. It may, however, be necessary further to note, that should the bowels become obstructed in progress of the disease, an evil by no means common, then a drachm of the compound powder of jalap (formed of two parts cream of tartar with one of jalap) and one grain of the herb, treated as above, formed into a pastil with syrup or sugar, should be given to an adult, and half the quantity to a child. This simple medicine shuts out every other form or article whatever as totally unnecessary, if not pernicious.

"The *methodus medendi* of the medicines capable of effecting results so gigantic, remain now only to be given, and appear to be as follows: The herb, by its anti-febrile properties, lays hold at once of the fever, the prolific source of woe, which it immediately strangles, while the zinc acts the part of a tonic, instantly restoring the equili-
